

Neighbourhood Watch York Place & Windmill Close

UNUSUAL FLYER THROUGH OUR DOORS.

Tuesday 5th August 2025

Warning!
Stalkers in Local Neighbourhood

Were you given unsolicited information about someone you've never met, and told they were a criminal that needed monitoring?

Were you asked to watch a person's home to alert others of their comings and goings? Or, respond to an alert to walk past them wearing accessories or clothing that they will associate with the stalking program?

This area has ongoing 'gang stalking' activity. The crime is not related to street gangs, rather it involves illegal surveillance and harassment of innocent people by multiple individuals working together. Often the stalking is done for vengeance or to silence potential whistleblowers. The people who organise stalking operations are usually criminals, private security firms or corrupt members/former members of the law enforcement community.

Tactics include stalking, 'street theatre' (acting out a scene that references the victim's recent concerns/fears), breaking into the victim's home, slander (lying about the victim), sitting in parked cars monitoring, illegally tapping phone lines, hacking computers, and other serious violations of UK law.

This slightly menacing and deliberately disturbing document was hand delivered through our doors. It asserts that there is danger and skulduggery afoot in the "Local Neighbourhood". So it's a generic leaflet, not something particular to York Place or anywhere else.

I think most of us can easily answer the three questions posed at the start of the document with a definite 'no'.

The next two paragraphs are rather paranoid in tone, alleging large scale coordinated harassment of individuals by organised but anonymous groups.

The websites referred to are both USA based and feature what are often referred to as conspiracy theories. The screenshot below gives a taste of one of them.

6) Everyone is being tracked through the top of their heads

Everyone is being tracked in violation of their Fourth Amendment rights

Gross violation of the Constitution and Privacy Rights.

A Gauss meter proves it. Lockheed Martin and Boeing GPS Satellites are being used by the US Space Force and the CIA to track everyone in America in violation of your rights under the Fourth Amendment.

These corporations have an obligation to tell their shareholders of their potential liability to the victims of crimes against humanity facilitated by them.

My personal view is that we can safely ignore this and Keep Calm and Carry On...

Neil Woolford
Co-ordinator Neighbourhood Watch, YP and WC.
